

A-Frame Shed With Wood Siding

Wooden A-Frame sheds are the epitome of the classic backyard building. And at Bestway, we use nothing other than the highest quality materials for your shed.

The siding, and LP SmartSide product, features a 5/50 year limited warranty, and comes primed for easy painting.

Our doors are custom made, and although they come standard with a 5' wide opening, we can easily create openings for those large tractors and lawn equipment. All of the trim around the doors, gables, eaves, and corners is real wood- not flimsy bent aluminum or imitation material. Where as competitors frequently use

untreated floor studs or plywood- Bestway always uses all treated wood and plywood at no extra cost to you!

We strive to give you a shed that will outlast your neighbor's, and live up to your highest expectations.

Like all of our sheds, our wooden A-frame is extremely customizable- so where you could use the same building for garden tools and storage- you can also pick and choose options to create a dream home office, pool shed, or getaway.
